PROFESSIONAL SUMMARY

Final-year B.Tech student skilled in full-stack development using **Spring Boot** and **MERN stack**. Built production-grade backend systems with JWT authentication, REST APIs, PostgreSQL integration, and API documentation using Swagger/Postman. Deployed apps on AWS and Netlify. Proven ability in both frontend and backend roles, with strong problem-solving showcased in Flipkart Grid 6.0 Hackathon (Round 3).

EXPERIENCE

❖ Web Development Intern | Teachnook Edutech

Aug '24-Jan'25

Developed and enhanced UI/UX using React.js, improved load time by 20%, and later contributed to backend APIs using Node.js during 6-month internship at Teachnook.

❖ Hackathon – Advanced to Round 3 of Flipkart Grid 6.0 Hackathon, showcasing strong problem-solving skills. Collaborated on real-world software challenges with a focus on algorithms and innovation.

PROJECTS

❖ Uber – Ride Booking (Backend API)

Jun '25 |  | Live 

Built Uber-style backend with Spring Boot, JWT auth, and PostgreSQL.

Features-

- Developed & deployed a secure, scalable backend API inspired by Uber using **Java, Spring Boot, Spring Security, and PostgreSQL**
- Implemented role-based **JWT authentication** for Rider, Driver, Admin
- Created **REST APIs** for booking, cancelling, viewing rides, and assigning drivers
- Documented endpoints with **Swagger**; tested **with Postman** using a public collection
- Deployed on **AWS Elastic Beanstalk**

❖ Stubnb - Affordable and Comfortable Living Spaces Tailored for Students

Feb '24 |  | Live 

A full-stack student housing platform built with MERN stack and Cloudinary

Features-

- Implemented **secure user authentication (JWT & hashed passwords)** and Google login
- Developed responsive UI using **React, Tailwind CSS, and Framer Motion**.
- **Enabled listing creation, booking, and media upload with seamless UX.**
- Integrated **Cloudinary** for optimized image storage and delivery.
- **Achieved 500+ visitors in the first 2 weeks after launch. Achieved 500+ visitors in the first 2 weeks after launch.**
- Backend powered by **Express.js and MongoDB** for robust data management.

TECHNICAL SKILLS

- ❖ **Languages:** Java, JavaScript, HTML5, CSS3
- ❖ **Backend:** Spring Boot, Spring Security, Spring MVC, Express.js, Node.js
- ❖ **Frontend:** React.js, Next.js, Tailwind CSS, Vite
- ❖ **Database:** MongoDB, PostgreSQL
- ❖ **DevOps & Tools:** Git, GitHub, Postman, AWS Elastic Beanstalk, Netlify, Vercel

EDUCATION

- ❖ **High school** – City Montessori School
- ❖ **Intermediate**-Central Academy
- ❖ **Bachelors of Technology in Computer Science Engineering** from Galgotia's University
