PROFESSIONAL SUMMARY

2025 CSE graduate and Software Engineer with hands-on experience building and deploying full-stack production systems and AI-powered applications. Proficient in Python, Java, React, and modern backend frameworks including FastAPI and Frappe/ERPNext. Experienced designing REST APIs, relational databases, secure authentication systems, and cloud-native deployments. Practical exposure to Generative AI, LLMs, and RAG pipelines through independent project work. Currently developing enterprise applications for international clients, with a strong foundation in data structures, algorithms, and system design.

EXPERIENCE

Software Engineer | Navtech

Jun 2026 – Present

- Developing and customizing enterprise applications using Python on the Frappe/ERPNext framework for international clients across finance, insurance, and telecom sectors.
- Collaborating with cross-functional teams and clients to understand requirements and deliver scalable, maintainable business solutions in an Agile environment.
- Working on real client deployments, including on-site engagement, gaining exposure to enterprise-scale system design and business process automation.

Software Engineer | B2B Procurement Platform (Independent)

Sep 2025 – Jun 2026

- Independently designed and built a live, full-stack B2B procurement platform from scratch, handling frontend, backend, database, authentication, and deployment end to end.
- Built RESTful APIs and a normalized PostgreSQL database schema across 5 core tables, implementing Row Level Security, role-based access control, and Google OAuth authentication.
- Designed a secure admin panel and user dashboard supporting real-time order tracking, quotations, and email notifications across 25+ product categories.
- Identified and resolved a critical production security vulnerability, rewriting git history and rotating credentials with zero downtime.
- Set up CI/CD pipelines on Vercel with GitHub for continuous, zero-downtime deployment, and monitored application performance and query optimization.

PROJECTS

OmniLeap — Agentic AI Platform, Python, LLMs, RAG, GCP

Aug 2025

GitHub: github.com/huzaifa1097 Live: omni-leap-ai-agent.vercel.app

- Built a full-stack agentic AI platform with a RAG pipeline using ChromaDB and SentenceTransformers, multi-agent orchestration via LangChain and CrewAI, and LLM integrations with Gemini and Groq.
- Containerized with Docker and deployed on GCP Cloud Run with CI/CD; built React/TypeScript frontend with Firebase authentication and Firestore storage.

Uber Ride Booking — Backend API, Java, Spring Boot, PostgreSQL, AWS

Oct 2024

GitHub: github.com/huzaifa1097/uber-spring-boot Live: [Live API](#)

- Built a production REST API with Java, Spring Boot, and PostgreSQL, featuring role-based JWT authentication and transactional ride-booking workflows, deployed on AWS Elastic Beanstalk.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Backend: FastAPI, Spring Boot, Frappe/ERPNext, REST APIs, Node.js

Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS

AI & LLMs: LLMs, RAG Pipelines, LangChain, CrewAI, ChromaDB (Vector DB)

Databases: PostgreSQL, MySQL, MongoDB, Firebase Firestore, Supabase

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub, CI/CD, Vercel

Core Concepts: Data Structures & Algorithms, OOP, System Design, REST API Design, Security

EDUCATION

Bachelor of Technology, Computer Science and Engineering

2021 – 2025

Galgotias University | CGPA: 7.17 (71.7%)
